REGULATION CHANGES FOR CONSULTATION

Committee: Race Committee
Date of meeting: 10th November 2011
Closing date for consultation: 31st January 2012
Email for comments: RaceConsultation@msauk.org

Section Q

Existing Regulation

Q19.2.1. Have any windscreen if of glass, of laminated type only.

Proposed Regulation

Q19.2.1. (a) Have any windscreen if of glass, of laminated type only.
(b) Rear screens to be clear, or may be tinted such as not to significantly affect through vision (in or out) or distort the colours of signal flags or lights.

Implementation date: 1st January 2013
Reason: J.5.2.10 has been amended to permit vehicles which have heavily tinted windows as Original Manufacturers equipment. The TAP suggest that in Car Racing the rear window must remain clear to ensure clear through vision for following vehicles in racing situations.

Circuit Breakers and Ignition Components

No current regulation

Electrical Equipment, Circuit Breakers and Ignition Components

(Q)19.11.3
With the exception of Clubmans Cars, 750 Formula, Legends Cars and Period A to E, all vehicles must be equipped with brake lights which are directly operated by the braking system without any time delay

Section (B) Nomenclature & Definitions

No current definition.

Clubmans Cars: Open Sports Racing Car constructed in accordance with the technical regulations published by The Clubmans Register.

Implementation: 1st January 2013
Reason: Section (J) applies to all disciplines unless discipline specific regulations modify them. Many vehicles currently racing do not comply with (J)5.14.3. and this proposal takes account of that.
