Current Regulation

6.6. All timing equipment used at any Motorsport UK Permit event must have a licence plate attached, and proof of current certification must be available at all times.

Proposed Regulation

6.6. All timing equipment used at any Motorsport UK Permit event must have a licence plate attached, and proof of current certification must be available at all times (except for Interclub or Clubman non-Speed Event competitions when this requirement only applies if specifically detailed in the discipline Specific Regulations). Table 6.6 identifies which events require certified timing equipment.

Reason: Clarification – not all disciplines require certified timing equipment. The increasing use of Apps for timing has brought the wording of 6.6 into question as it implied that all events required certified equipment. This proposal clearly sets out or which events it is required.

Date of implementation: **Immediate**
